

I support RM-10867 and urge that Commission adopt it. I am an Extra Class amateur. I was originally licensed in 1951. I feel this proceeding is simple, does not penalize any existing license holder, provides a logical path for upgrade, and eliminates existing inconsistencies (No-code/coded technicians, Novices, Advanced class). I believe it recognizes the traditional values of Amateur Radio by maintaining a Morse code requirement for the Extra Class while relieving it from lower class examinations. Again, I urge the Commission's support.
